

## POLYURETHANE SHEETS + METAL

**Description:** After preparing the supports, coating and post-cooking, the whole set can be folded, rolled and cut; it is resistant to impacts, abrasion, and compression. It can also stand all chemical agents and ultraviolet rays

**Fixing:** fixing the whole set could be realized through screwing, riveting, pinching or spot welding (avoid burning the elastomer).

**Metal sheet:** Flat galvanized sheet (15/10 thick)

**Polyurethane:** 70 Shores A – about 3.5 mm thick – Yellow color (standard color)

**Dimensions:** 2,000 x 1,000 mm

**Total thickness:** about 5 mm
