## *FLEXIBLE PROTECTIONS*

This flexible protection is made-to-measure in order to fit into the most complex forms and could be precisely adjusted. Once made, it is kept fixed through a lacing (1), and covered with a self-gripping flap (2). Making techniques guarantee an easy and efficient on-the-spot laying.

Flexible protection is realized through a foam sandwich (3) that is covered with a skin (4) with high mechanical resistance.

### Technical characteristics :

<b>Quality</b>	:	PVC on Polyester
<b>Fire classification</b>	:	M2
<b>Foam</b>	:	PE Thk. 25 or 40 mm
<b>Density</b>	:	25 kg/m <sup>3</sup>
<b>Break resistance</b>	:	RR = 235 daN (medium) RD = 140 N/m (medium)
<b>Chemical resistance</b>	:	Detergents      Medium UV                      Excellent

### Price examples :

Protection of a Ø 200 diameter/2 m high post: 686.75 € Excl. tax

Delivery deadline: 6 weeks.
